# HERITAGE VALLEY HEALTH SYSTEM

## PRICING TRANSPARENCY

Heritage Valley Health System believes pricing transparency is a benefit to the customer and an important part of the health care decisions patients and families will be making in the future.

Below is a basic price listing of the most commonly utilized procedures for Diagnostic Imaging, Laboratory Services, and Outpatient Surgery. The cash prices listed below are for non-insured patients only. They represent hospital fees only and do not include physician interpretation fees, which would be billed separately if required. Given the variability of insurance plans, co-insurance and deductible rates for the procedures listed below will vary when submitted to your insurance company.

In addition, fees associated with our ConvenientCare walk-in clinics are included below.
