

Meet Our Physicians

Ankur R. Gosalia, M.D.

Ankur R. Gosalia, M.D. is triple board certified by the American Board of Anesthesiology in Interventional Pain Medicine, Anesthesiology, and Cardiac Anesthesiology. He completed his anesthesiology training at the University of Pennsylvania in Philadelphia, and his ACGME Interventional Pain Medicine fellowship at Allegheny Health Network here in Pittsburgh. With his knowledge and use of advanced pain medicine, Dr. Gosalia has helped many patients who had little hope of a functional life.

David M. DeChellis, D.O.

David M. DeChellis, D.O. is board certified in Pain Medicine, Interventional Pain Medicine and Physical Medicine and Rehabilitation, with formal training at the University of Pittsburgh Medical Center (UPMC), the University of Miami and the Allegheny Health Network. He completed his ACGME Interventional Pain Medicine fellowship at West Penn Allegheny Health System in Pittsburgh. Dr. DeChellis specializes in spinal procedures, neuromodulation and regenerative medicine procedures.

At Ohio Valley Pain Treatment Center, our team of pain management physicians are dedicated to helping your patients with their pain through a multi-modality approach.

Pain is a complex, frustrating and debilitating problem that affects at least 100 million adults in the United States. Pain limits physical function, causes emotional stress and dampens overall quality of life.

We treat a number of pain conditions, including:

- Low back pain / spinal stenosis
- Neck pain
- Herniated or bulging discs
- Pinched nerves
- Musculoskeletal and joint pain
- Arthritis pain
- Sciatica & nerve injury
- Persistent pain after surgery (spine, joint, abdomen)
- Motor vehicle injuries
- Fibromyalgia
- Neuropathy
- Cancer-related pain
- Complex regional pain syndrome (RSD)
- Myofascial pain syndrome
- Phantom limb pain

Ohio Valley Pain Treatment Center provides life-changing, intelligent, comprehensive pain treatment options.

Treatment modalities are customized to the patients' needs and may include:

- Exercise and physical therapy programs
- Image-guided diagnostic and therapeutic injections
- Minimally-invasive interventions
- Comprehensive pain medication management
- Pain psychology and cognitive behavior therapy
- Spinal cord stimulation
- Peripheral nerve stimulation
- Minimally invasive lumbar decompression
