Pregnancy Health Services Program

Uniquely Connected. For Life.SM

HERITAGE VALLEY
HEALTH SYSTEM

What is the Pregnancy Health Services Program?

The Pregnancy Health Services Program is sponsored by Heritage Valley Health System and your physician for all pregnant women who have certain risk factors that could lead to the birth of a premature baby.

Who benefits from the program?

All women experiencing a pregnancy with risk factors and their unborn babies can benefit from the program. If your physician is on staff at Heritage Valley Beaver or Heritage Valley Sewickley, you are eligible. Your care will be individualized according to your own special needs.

Why is the Pregnancy Health Services Program so important?

Risk factors during pregnancy may lead to the premature birth of an infant. Premature infants may require a long hospitalization and develop serious problems with their breathing, vision, hearing, digestion and growth and development. The goal of the program is to decrease premature births.

How does the program work?

Experienced obstetrical nurses from Heritage Valley Health System work closely with your physician to provide:

- Education and support
- Home checkups, when needed
- Referrals to dietitians and social service agencies

What will I have to pay for the program?

The Pregnancy Health Services Program is **FREE** of charge.

How can I get involved in the program?

Ask your doctor if he/she feels that a referral is appropriate, or call 866.328.8389 (toll free).

Risk Factors:

- Risk of pre-term labor
- Diabetes
- Multiple pregnancy (twins, triplets)
- High blood pressure
- Smoking
- Alcohol Use
- Teen pregnancy
- Other factors as designated by your physician
