

About Heritage Valley BreastCare

Heritage Valley BreastCare is a comprehensive, integrated breast health care program offered through Heritage Valley Health System. The primary full service locations for the program are the Heritage Valley Women's Health Centers located in Center Township and Robinson Township. In addition, diagnostic mammography and breast ultrasound are available at the Heritage Valley Edgeworth Medical Neighborhood, and there are four additional screening locations in western Allegheny County, Beaver County, Lawrence County and eastern Ohio.

The Heritage Valley BreastCare program offers a range of services, from screening and diagnostic breast imaging to treatments for breast cancer. All of these services are available within the Heritage Valley Health System network, where committed, high quality physicians deliver care.

Centers of Excellence

The primary Heritage Valley Women's Health Centers are each designated as a Breast Imaging Center of Excellence by the American College of Radiology (ACR).

Mammography

Screening mammography has proven to be the most effective tool identified for the early detection of breast cancer. Screening mammograms are recommended for women 40 years of age and older, as well as younger women who are at special risk for developing breast cancer. Heritage Valley BreastCare provides full field digital mammography for screening and includes Digital Breast Tomosynthesis (also known as 3D mammograms). Additionally, the BreastCare program supports self-requesting, which means that you do not need a physician's order to schedule your annual screening mammogram.

Women who have experienced an abnormal finding during a screening mammogram or who have identified an issue with their breast(s) are referred for a diagnostic evaluation. Heritage Valley's BreastCare Patient Advocate coordinates any additional imaging that is necessary. During a diagnostic mammogram and/or ultrasound, a Radiologist reviews the images while you are at the appointment. Results are made available to the patient at the conclusion of the additional imaging. The program has dedicated Radiologists who are experienced in reading mammograms.

Depending on findings from your breast imaging study, other types of imaging tests may also be needed. The BreastCare program has the capacity for further testing, including:

- Diagnostic mammography views as needed
- Traditional hand-held breast ultrasound
- 3-Dimensional full volume breast ultrasound
- Breast MRI
- Ductography
- Computer Aided Detection (CAD), including new ICAD ProFound Artificial Intelligence

Locations

Heritage Valley Women's Health Center
200 Pleasant Drive
Center Township, PA 15001

Heritage Valley Robinson Township Medical Neighborhood
2201 Park Manor Boulevard
Pittsburgh, PA 15205

- Monday - Friday, 7:30 am to 6:00 pm
- Saturday, 7:30 am to 4:00 pm

In addition to the two primary Women's Health Center locations, **screening mammography services** are available at the following convenient locations:

- Heritage Valley Calcutta Medical Neighborhood
- Heritage Valley Center Medical Neighborhood
- Heritage Valley Chippewa Medical Neighborhood

Heritage Valley BreastCare Program

 HERITAGE VALLEY
BREASTCARE

The advanced breast imaging capability of the BreastCare program also enables minimally invasive image-guided procedures to be completed. This includes:

- Ultrasound guided core biopsy (including vacuum assisted technique)
- Stereotactic breast biopsy
- MRI guided breast biopsy
- Radioactive Seed Localization (RSL) procedures to assist surgeons with the removal of non-palpable breast lesions

Treatment

When a mammogram or test uncovers an issue it can be a difficult time, filled with anxiety. Heritage Valley's BreastCare Navigator is specially trained to work with patients in this situation to efficiently and compassionately coordinate follow-up care, timely diagnosis and treatment.

Heritage Valley's BreastCare program provides a simple, diagnostic pathway led by the BreastCare Navigator to follow the patient from screening imaging through minimally invasive biopsy techniques and ultimately, if needed, coordinated follow-up care. Follow-up treatments are available within the Heritage Valley Health System and include surgical consultation, medical and surgical oncology consultation and treatment, referrals to support programs and other services determined to be appropriate.

Every step of the way, the BreastCare Navigator will be in close contact with the patient to explain treatment options and schedule the next appointment. The goal is to help alleviate much of the stress associated with this experience.

Our Team

The Heritage Valley BreastCare program is comprised of a multidisciplinary team of dedicated breast care professionals, each with a unique role, including:

Radiologist: Committed physicians who are specially trained and experienced in the interpretation and reporting of breast images. Our Radiologists have great expertise in performing breast biopsies and other breast procedures.

Specialists: Surgeons, Radiation Oncologists, Medical Oncologists, Pathologists, Psychologists and others who provide state-of-the-art care for women with various breast abnormalities.

Patient Advocate: Ensures appropriate and timely follow-up of every breast imaging exam to meet regulatory compliance standards. This includes scheduling follow-up breast imaging exams and notification to referring physicians.

BreastCare Navigator: Works in collaboration with all BreastCare team members and referral sources to efficiently coordinate follow-up care. The Navigator will communicate results and ensure timely diagnosis and treatment of Heritage Valley BreastCare patients.

Mammography Specialist: Performs consistently high quality screening and diagnostic mammograms with compassion and sensitivity at all Heritage Valley BreastCare locations. Additionally, collaborates with the Radiologist, BreastCare Navigator, Patient Advocate and patients in a professional and courteous manner at all times.

Ultrasonographer: Performs high quality ultrasound exams and assists the Radiologist in performing ultrasound-guided procedures. Exams are performed utilizing a high level of skill, competency and independent judgment. The Technologist produces and evaluates images and relays supporting clinical data to be used by the interpreting physician to render a diagnosis.

Physicians

Justin S. Torok, MD

Medical Director, Women's Imaging, Heritage Valley Health System

Dr. Torok received his Medical Degree from The Pennsylvania State University College of Medicine and completed his residency at UPMC. He completed a fellowship in abdominal imaging at UPMC, as well as a fellowship in women's imaging at Magee-Women's Hospital of UPMC. Dr. Torok is Board Certified in Diagnostic Radiology by the American Board of Radiology.

Saadia Kahn, DO

Dr. Khan received her Doctor of Osteopathic Medicine degree from Lake Erie College of Osteopathic Medicine and completed her

residency at UPMC. She completed a fellowship in Women's Imaging at Magee Women's Hospital of UPMC and is Board Certified in Diagnostic Radiology by the American Board of Radiology.

Mark Schnurer, MD

Dr. Schnurer received his Medical Degree from the University of Pittsburgh School of Medicine and completed his residency at Cook

County Hospital in Chicago, Illinois. He completed his fellowship in ultrasound and angiography at West Penn Hospital and is Board Certified in Diagnostic Radiology by the American Board of Radiology.

Deborah D. Troy, MD, CCD

Dr. Troy received her Medical Degree from the Medical University of South Carolina and completed her residency at Alton Ochsner Medical Foundation

in Jefferson, Louisiana. Dr. Troy's area of concentration is women's imaging, including all aspects of breast imaging and breast biopsy, OB-GYN imaging and bone densitometry. Dr. Troy is Board Certified in Diagnostic Radiology by the American Board of Radiology.

Breast Surgeons

Kyung Kim Incorvati, MD

Dr. Incorvati received her Bachelor of Science degree in Psychology at Duke University in Durham, North Carolina and received her Medical Degree at

UCLA in Los Angeles, California. She completed post-graduate training at University Hospitals of Cleveland, Case Western Reserve University. Dr. Incorvati is Board Certified by the American Board of Surgery and is a member of the Beaver County Medical Society and the Pennsylvania Medical Society.

Sheri Morris, MD

Dr. Morris is a Board-Certified General Surgeon, with one of her specialties being breast surgeries. Dr. Morris has more than 20 years of experience as a

General Surgeon, having maintained a private practice in Albuquerque, New Mexico for more than 12 of those years. She is dedicated to providing excellent surgical care with a patient-centered approach. She earned her Medical Degree from The University of Texas Health Science Center at Houston and completed her residency in General Surgery at the University of New Mexico School of Medicine in Albuquerque. She is a Fellow of The American College of Surgeons.
